Hyderabad, Telangana | paulrajmanubarthi@gmail.com | 9010840240

Professional Summary

Technical Support Engineer with 2+ years of experience across ecommerce UI support, Shopify app integrations, and large-scale site reliability operations. Proficient in resolving merchant-facing issues for Shopify-based apps, troubleshooting theme and widget conflicts, managing payment and order flows, and handling incident management at enterprise scale. Hands-on with HTML, CSS, JavaScript, ServiceNow, Splunk, Jira, Zendesk, OpsGenie, AWS, and Shopify.

Professional Experience

Artos Software | Technical Support Engineer

Oct 2025 - Present | Remote

Shopify App Support (STOQ, Filemonk, Invoice Falcon)

- Provide merchant-facing technical support for STOQ (Preorder & Back-In-Stock), Filemonk (file delivery), and Invoice Falcon (invoicing) Shopify apps.
- Diagnose and resolve UI issues including widget rendering failures, theme conflicts, Liquid template mismatches, and missing embed blocks.
- Assist merchants in configuring preorder, back-in-stock, and waitlist widgets across products, variants, and collections.
- Resolve CSS/JavaScript conflicts caused by theme updates or custom code overrides affecting app functionality.
- Validate widget behaviour across different devices and browsers to ensure consistent storefront experience.
- Perform UI regression testing after app updates to prevent layout breakages and customer-facing defects.
- Assist with Shopify theme building tasks and integrations - embedding app blocks, modifying theme files, and resolving script injection issues.

Payments & Order Fulfillment Support

- Review and resolve payment issues including failed charges, partial payments, and authorization mismatches.
- Validate STOQ-generated orders for correct payment capture, tagging, and visibility in Shopify Admin.
- Troubleshoot fulfillment delays, order sync failures, and incorrect preorder/backorder workflows.

Merchant & Integration Support

- Communicate with merchants via Crisp and support channels to deliver timely, accurate resolutions.
- Coordinate with internal engineering and product teams to escalate and resolve complex bugs or integration failures.
- Document recurring issues and contribute to internal knowledge base to improve first-response resolution rates.

Fanatics Inc | Production Support Analyst - Site Reliability Operations

Nov 2023 - Oct 2025 | Hyderabad, India

Incident & Severity Management

- Managed end-to-end incident lifecycle - detection, triage, escalation, resolution, and post-incident review.
- Raised and coordinated severity (SEV) incidents, connecting with stakeholders and engineering leads to drive fast resolution.
- Led incident bridges and SEV calls, providing real-time status updates to business and technical stakeholders via Slack.
- Prioritized incident resolution based on business impact, ensuring SLA adherence and minimal customer-facing downtime.
- Performed root cause analysis (RCA) and delivered post-incident reports with preventive action recommendations.
- Coordinated escalations and on-call alerts using OpsGenie for rapid incident response.

Monitoring & Observability

- Configured and managed alerts through New Relic, SolarWinds, and BigPanda for proactive issue detection.

- Monitored dashboards and logs using Splunk and MuleSoft to troubleshoot integration workflows and identify anomalies.
- Troubleshot AWS EC2 and application-level issues using CloudWatch and supporting observability tools.
- Performed server reboots and patch deployments through Tanium across Linux and Windows environments.

Ticket & Communication Management

- Managed and tracked incidents using ServiceNow, Jira, and Zendesk ensuring accurate prioritization, assignment, and resolution.
- Maintained stakeholder communication through Slack channels during high-priority incidents and planned maintenance.

Storefront & UI Support

- Troubleshot storefront UI issues including broken components, product visibility errors, and rendering failures.
- Validated cart, checkout, and payment UI flows to ensure smooth customer purchasing experience.
- Conducted UI regression checks after deployments to prevent customer-impacting defects.

Core Skills

Ecommerce & Shopify: Shopify Theme Development, Liquid, Shopify Admin, App Integration, Widget Support

Frontend: HTML, CSS, JavaScript, React.js, Front-End Debugging, UI Regression Testing

Incident Management: Severity Management, RCA, Post-Incident Reporting, SLA Management

Support & Ticketing: ServiceNow, Jira, Zendesk, OpsGenie, Crisp

Monitoring & Observability: Splunk, New Relic, SolarWinds, BigPanda, MuleSoft, AWS CloudWatch

Cloud & Infrastructure: AWS EC2, Tanium, Linux, Windows

Other Tools: GitHub, MySQL, Slack

Education

Bachelor of Technology - Mechanical Engineering

Nadimpalli Satyanarayana Raju Institute of Technology | 2017 - 2021
